

Project Plan

Step One: Student Info

- Email: waltetta@gmail.com
- Name: Mimi Rhodes
- Group: Code Louisville
- Class: Data Analysis Course 1

Step 2: Project Plan Scope

To create an exceptional and passing capstone project for Code Louisville or Code Kentucky. A Project Plan may include: wireframes, project briefs, and feature lists.

- Project Objective: Rental Property income and expense comparison
- Statement of Work: Compare multiple property income and expenses and see if the incoming funds are greater than the expenses being paid out over a couple of years.

Mock up of Data:

Property	Date	Source(CC,Cash)	Description of Item	Cost/Income	Running Total
----------	------	-----------------	---------------------	-------------	---------------

Step 3: Project Features

Please choose from the list of features provided in the Project Requirements document.

- Feature 1: Python: Using Lists
- Feature 2: Pandas read_ functions to read in data from .csv file
- Feature 3: Handling Missing Data
- Feature 4: Print Data
